

# Multiphase Pump User Roundtable

*From Deepwater to Onshore Unconventional*

The Multiphase Pump User Roundtable (MPUR) is an industry leading formula for sharing learnings generating discussion exclusively on topics associated with multiphase pumping. We are pleased to re- start MPUR in 2021, the day before the Texas A&M Turbomachinery & Pump Symposia in Houston. The past several years have seen several subsea projects sanctioned and new pilots in the onshore arena. Now in its 22<sup>nd</sup> year, the MPUR is an event based on end-user presentations and features strong end- user leadership in discussion and technology panel sessions. The goal of the event is to connect operators with technologies and foster discussion. Also, in-scope are new and emerging technologies and applications to reduce emissions.
